Amber Huffman	Intel	1/9/2006

Description of the specification technical flaw (add space as needed)

T13 has reserved words 207-208 and 224-233 for CE-ATA's use in the ATA/8 specification. The CE-ATA Features register, that currently has all bits reserved and is defined at Word 106, does not reside in the words reserved for CE-ATA which may in the future result in a conflict with T13 definitions for that word. This erratum moves the CE-ATA Features to one of the words reserved for CE-ATA's use.

Description of the correction

Figure 21 in section 4.2.1.4 shall be modified as shown:

Word	O/M	F/V	Description
206 224	M	F	CE-ATA Features 15-0 Reserved (0)

Section 4.2.1.12 shall be modified as shown:

4.2.1.12 Word ~~206~~ 224: CE-ATA Features

Word ~~206~~ 224 indicates optional CE-ATA features that are supported by the device.

No optional features are currently defined. All bits in this word are reserved.

Disposition log

1/9/2006	Erratum captured
3/12/2006	Erratum ratified
